blog2.0

ramoneando blog 2nd version with nodejs

Node.js Blog Tutorial

tl;dr

`mkdir nodejs-blog-tutorial` create directory
`cd nodejs-blog-tutorial` access directory
`npm init` creates package.json
`npm i startbootstrap-clean-blog` installs package + node_modules directory
`npm i express` installs package
`npm i nodemon` installs package
`touch index.js` creates file
`mkdir public` creates directory

edit index.js

```
const express = require('express');

const app = new express();

app.use(express.static('public'));

app.listen(4000, () => {
    console.log('App listening on port 4000')
});
```
